Creating an Order for a Colonoscopy in eCW 11e

Double click on the patient in the ASC schedule, then select the patient's name to open the Hub.

Click on “DI” in the side panel (along the left side of the Hub) to access the diagnostic imaging folder.

Then click on “New”.

In the diagnostic imaging screen, click on the ellipsis next to “Search by DI Name”.

Select the DI company as “All”.

Now select “Colonoscopy”.

The current date drops into the “Performed Date” box by default. It is very important to check the box next to the date. Then click on the “Results” tab.
In the “Results” screen, click the box next to “Received”. The current date automatically appears in the “Result Date” box.

Once the order has been completed, check the “Reviewed” box, and then click “OK”.
